WELDING
INSPECTION SERVICE
001

General terms

1. Before carrying out welding work this certificate - as certified copy - has to be submitted to the responsible construction authorities.
2. For advertisement or other purposes this certificate may only be duplicated or published in full. The text of any advertisement must not be in contradiction to this certificate.
3. The inspecting body has to be informed in time of welding coordinator(s) mentioned in this certificate leaving the company, or of changes in the welding processes or of changes of essential parts of the welding facilities. If considered necessary by the inspecting body a new inspection of the company will take place.
4. If doubts arise regarding the qualification of the company the right of inspection and checks of the company by the inspecting body and without prior announcement is being reserved.
5. This certificate may at any time and with immediate effect be withdrawn - without any loss compensation - or supplemented or modified if the conditions under which this certificate has been issued have changed or if the requirements laid down in this certificate are not complied with.
6. At least two months before expiry an application for renewal has to be submitted to the inspecting body.
